

ENVIRONMENTAL AND QUALITY POLICY

The field of application of the integrated quality and environment management system defined by AS LABRUNA S.r.l. is as follows: marketing and distribution of marine and industrial engines, diesel, hybrid, and integrated systems for marine propulsion, generator sets, lifting equipment and their spare parts.

Senior Management:

- is aware that a responsible business strategy, which takes into consideration environmental and quality issues, is essential for the protection of all internal and external parties affected by company's performance;
- recognizes that continuous improvement of the company's environmental and quality performance leads to significant commercial and economic advantages and satisfies the progress expectations in the context of the territory in which the company operates;
- undertakes to pursue a company policy of continuous performance improvement by eliminating or minimizing, if technically possible and economically sustainable, any risk arising from the company's activities;
- undertakes to adapt the company policy to the risk dimensions defined in the company's Integrated Management System including substantial contribution by its employees, commercial partners and all other interested parties;
- undertakes to integrate the company policy with other corporate strategies aimed at improving the environment, productivity, profitability, reliability and image;
- annually defines improvement objectives used to measure and evaluate the validity and effectiveness of the Integrated Management System and identifies adequate means and resources for that matter.

The company is committed to:

- comply with laws, relevant environmental regulations and its other commitments;
- maintain an effective Integrated Management System that takes into account the requirements of UNI EN ISO 14001;
- prevent pollution and take appropriate impact mitigation measures;
- optimize the consumption of natural and energy resources;
- formulate targets for continuous improvement in environmental performance;
- adopt the technological processes that offer the least environmental impact where technically and economically sustainable;
- evaluate the environmental aspects of products and production activities and to adopt management procedures in order to minimize any significant negative environmental impact;
- raise awareness of all staff in order to promote and encourage all initiatives for the protection of the environment and to encourage their active participation in continuous improvement of the environmental and quality performance;
- raise awareness amongst all suppliers of the need to adopt an environmental management system and to promote their direct involvement in their own integrated management system;
- develop collaborative relationships with relevant institutions and to provide all necessary information for environmental protection and risk prevention in a complete, correct, adequate and timely manner;
- consider the requests from interested parties, carry out consultations, and information and involvement initiatives;
- operate with respect to environmental protection by adopting, where possible, the criteria of sustainability and/or life cycle in the supply of products and services.

The company further commits to:

- ensure compliance with customer requirements and applicable mandatory standards;
- maintain an effective Integrated Management System that takes into account the requirements of UNI EN ISO 9001;
- increase customer satisfaction;
- optimize costs and improve internal efficiency;
- increase presence in new markets and consolidate turnover in existing markets;
- pursue continuous improvement.

This policy is disseminated to all employees and is available to interested parties.
