## FUEL CELL

### DESCRIPTION

With the EFOY fuel cell you always have your own compact power generator with you and are completely independent off the power grid. The EFOY fully automatically recharges all common 12 or 24 V battery types reliably, quietly and in an environmentally friendly way. Whether in a motor home, on a boat or in a garden shed, or cabin, you decide where the EFOY will be used. The EFOY generates environmentally friendly electricity. In a chemical process; only waste heat and water vapour with a small amount of CO<sub>2</sub> are produced in addition to electricity. Therefore, the EFOY can be installed indoors without hesitation.
